Re: new EWPA pressure sensors

Dear Valued customer,

With the purpose to improve continuously its offer, Eliwell is introducing a new generation of pressure transmitters EWPA that will replace very soon the present product line.

All the main features remain the same or have been improved, as the IP protection for the version with embedded cable, with the aim to cover the same applications in the HVAC\R market.

Although, there are some minor differences on the dimensions or on the electrical connection that you can check at the section "DRAWINGS".

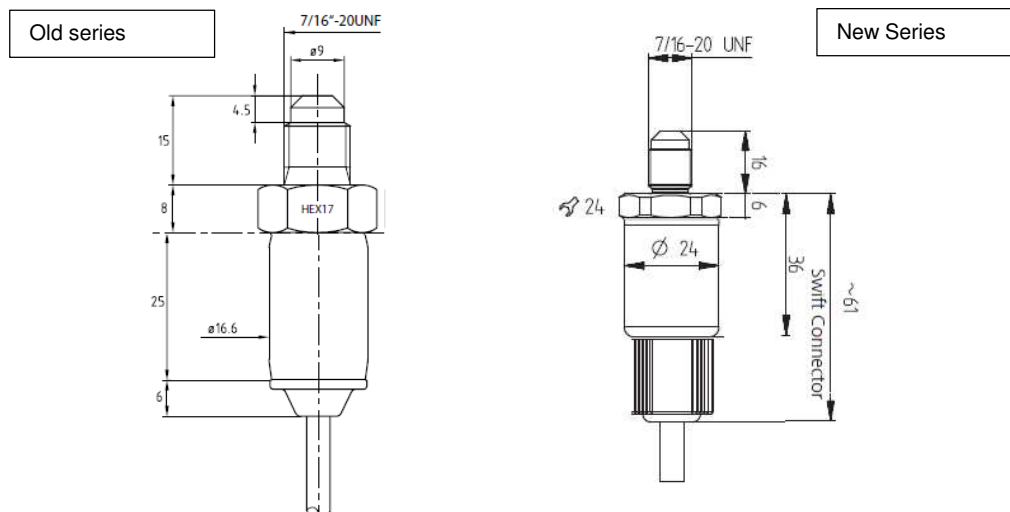

In order to have a smoother and easier transition from the old to the new series, you simply should add the suffix B at the end of the present part number. For instance, TD220007 will become TD220007B.

You will find the complete cross reference here below at the section "SINGLE PACK REFERENCES" or "MULTIPLE PACK REFERENCES".

The old series can still be ordered until **December 31st 2018** but starting from **September 1st 2018** a **10% price increase** will be applied to all the old part numbers.

Starting from January 1st 2019, unless inventory availability, all the purchasing orders will automatically be converted to the new series.
